

# GLUE GUNS & GLUE STICKS

## HOT MELT GLUE GUNS & GLUE STICKS

We started our business 31 years ago selling glue sticks. Today we sell glue sticks made to our specs under our SUPERTACK label. We sell state of the art glue guns made by Adhesive Technologies in New England. They have high tech **PTC (Positive Temperature Control)** which automatically drops the wattage to a low stand-by 25 watts when plugged in, but not in use. When you squeeze the trigger, the wattage jumps to 40 or 200 depending on the model. This feature prolongs the life of your gun. The **HD200** is a full industrial gun with 200 watts power, and 4 1/2 lbs./hr extrusion rate (Compare these specs to guns costing \$150.) The **PRO-90** is the world's largest selling trigger gun with 40 watts and 1 lb./hr extrusion. The **FPC HIGH/LOW TEMP CORDLESS** with power charging base can be used with or without the cord (about 5–10 minutes between charges) and has High/Low Temp settings. The **LOW TEMP MAGIC MELT™** uses oval, low temp glitter or white clear sticks. The Dual Temp Mini Trigger Gun uses 1/4" mini sticks. All the above guns are **very reliable and come with a one-year manufacturer's warranty.**

We offer six basic grades of glue sticks in 1/2" diameter X 4" or 10" lengths, also 1/4" X 4" mini, 5/8" X 2", 1" X 3" and 1" square chips. Samples available at \$6.00/lb.

**WHITE CLEAR PREMIUM** — extra strong, good on plastics and porous substrates

**WHITE CLEAR CRAFT** — most transparent, strong, good for crafts

**AMBER CLEAR** — high strength, dries clear with yellowish cast, good for demanding applications such as sea shells to ceramic, packaging, floral wreaths, taxidermy, etc. Also 1" square chips for pan melting.

**SUPER AMBER** — extra high strength, dries opaque honey color, strongest glue we have ever tested, good for wood projects, kitchen cabinet assembly, etc.

**WHITE METAL / PLASTIC** — dries clear, excellent bonding to metal or plastic — which are difficult substrates.

We also stock specialty glue sticks such as colorful glitter sticks, white clear mini sticks and oval, low temperature sticks, 5/8" X 2" and 1" X 3" industrial sticks. **Our oval low temp sticks which are used with our "Magic Melt™" gun melt at 225°F instead of 380°F standard for hot melt.** They burn your fingers less and will not melt certain substrates like urethane foam or latex balloons.

We also offer three types of **interchangeable nozzles: Standard** cone shape, 1 1/2" long **Hypodermic** (for detail work), and 1/4" **Spreader** (for a flat bead). **Price is \$4.75 each. When we ship full case quantities, we charge actual UPS/FedEx freight.**
